

### This is Fiber Glass Duct Wrap. Read this before you buy.

#### What you should know about R-Values.

The chart shows the R-value of this insulation. "R" means resistance to heat flow. The higher the R-value, the greater the insulating power. Compare insulation R-values before you buy. There are other factors to consider. The amount of insulation you need depends mainly on the climate you live in. Also, your fuel savings from insulation will depend upon the climate, the type and size of your house, the amount of insulation already in your house, and your fuel use patterns and family size. If you buy too much insulation, it will cost you more than what you'll save on fuel. To get the marked R-value, it is essential that this insulation be installed properly.

**Note:** The chemical and physical properties of Knauf Duct Wrap Insulation represent average values determined in accordance with accepted test methods. The data is subject to normal manufacturing and testing variations. The data is supplied as a technical service and is subject to change without notice.

Check with your Knauf sales representative to ensure information is current.

R-Value @ 75°F Mean Temperature							
Installed at 25% Compression	Out-of Package	Labeled Density	Thickness	Facing	Width	Length	Sq. Ft. Per Pkg.
