

**WE DIDN'T CHOOSE BROWN,
IT JUST CAME NATURALLY.**

ECOBATT[™]
insulation bonded with nature

with **ECOSE**[™]
TECHNOLOGY

THINK OF IT AS GREEN... ONLY BROWNER.

All Knauf products are sustainable, but EcoBatt™ Glasswool Insulation with ECOSE™ Technology takes that standard to a whole new level. ECOSE Technology is a revolutionary, more sustainable binder based on rapidly renewable bio-based materials. Combine ECOSE Technology with sand—one of the world's most abundant resources—and a minimum 30% post-consumer recycled bottle glass and the result is Knauf's EcoBatt Insulation.

Lab-tested, Mother Nature approved.

EcoBatt Insulation provides greater sustainability than we've ever before achieved, in addition to saving hundreds of times more energy in use than required to manufacture.

- ECOSE Technology eliminates the non-renewable petroleum-based chemicals like phenol, formaldehyde or acrylics traditionally used in fiber glass insulation. And it is up to 70% less energy intensive than our traditional binder, which reduces our carbon footprint.
- EcoBatt Insulation products are interior friendly. They are certified to the toughest indoor air quality certification in the industry, GREENGUARD for Children and Schools,SM and are certified to meet CHPS Low-Emitting Materials criteria section 01350. They also meet or exceed all applicable industry performance specifications and standards.
- New EcoBatt Insulation boasts exceptional quality and handling characteristics that keep installers happy and more productive—low dust, quick to recover, gutsy, yet easy to cut. And it has a pleasing natural installed appearance.

EcoBatt Insulation with ECOSE Technology, the next generation of insulation...naturally from Knauf.

EcoBatt Insulation is naturally brown— assures no phenol, formaldehyde, acrylics or artificial colors are used in the manufacturing process.

EcoBatt Insulation gives you the performance you expect and your customers deserve—thermally and acoustically efficient—an excellent insulating value.

EcoBatt Insulation ensures the professional touch—it has consistent quality, recovers quickly and is gutsy, easy to cut and less dusty. It also has a friendlier feel and a great natural installed appearance.

Knauf manufactures a full line of EcoBatt Insulation—a variety of widths, R-values, densities and facings.
